

Patented safety cap for advanced functionality and improved secureness

Allows markings without colored fingers.

# SPOTMARKING

Professional construction site marking for measuring, civil engineering, road works and road constructions

## Advantages

- novel safety cap with lockable spray actuator, avoids unintentional spraying
- special tilt valve for präzise wall- and basement markings
- adheres excellently even on humid surfaces
- markings stay visible for 6 - 9 months
- high-covering quality
- fluorescent colours with intensive luminance (up to 12 months)
- simple applications, even when wearing gloves
- fast drying, proper, non-drippy markings
- applicable during temperatures up to -20°C
- cap removable for special applications
- eco-friendly and not dangerous to health
- can sizes 500 ml

Available in following colour shades

### Spotmarker 500ml

201554	white
201547	yellow
201530	red
201578	grey
201561*	black

### Spotmarker Fluo 500ml

201479	fluorescent pink
201486	fluorescent red
201493	fluorescent orange
201509	fluorescent yellow
201516	fluorescent green
201523	fluorescent blue

### Spotmarker Allround 500ml

201585	fluorescent pink
201592	fluorescent red
201608	fluorescent orange
201615	fluorescent yellow
201622	fluorescent blue

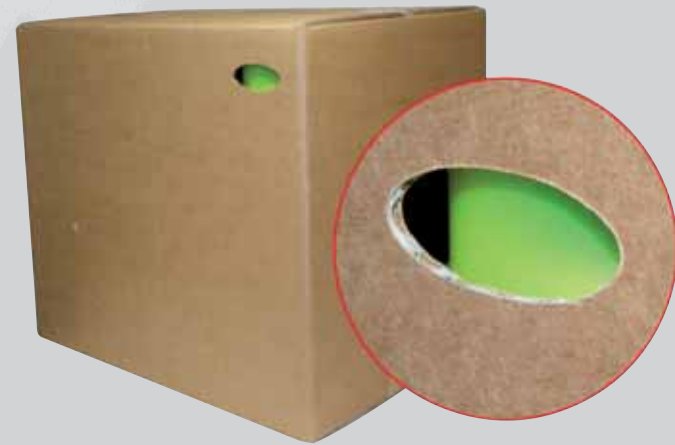

\* also applicable as correction spray (concrete/tar)

special spray head for exact lettering  
**NEW** - now available with safety cap

**NEW - the smart solution!**

Due to the perforated hole in the covering box you are able to see the content of the box at first sight.

# SPOTMARKING

Chalk spray “Eventmarker”

The COLORMARK Eventmarker is ideal suitable for markings, which has to be visible awhile (e.g. sport events, fairs, designation of accidents). Due to the special chalk formulation the marking stays only a few days or weeks and whitens very fast during continuous rain e.g. on highly frequented streets. Beause of the plant compatible ingredients even usable in gardening and landscaping as well as for markings on golf courts suitable.

## Advantages

- for short-term markings
- no damage of the marked object
- for interior and exterior use
- easily removable with water
- adheres excellently even on humid surfaces
- high-covering quality
- cap removable for special applications
- applicable during temperatures up to -20°C
- can sizes 500ml
- very ecological

Available color-tones

230790	white	231193	green
230806	yellow	231209	orange
230813	red	231216	pink
230820	blue		

Professional marking sprays for highest requirements:

- user-friendly product design
- CFC-free, therefore harmless to the ozone layer
- contains no lead and cadmium
- not injurious to health - no Xi and Xn labelling
- formulations free from xylene and toluene
- highest product quality and innovative technique directly from the manufacturer

You can count on that...

# LINEMARKING

The special marking of lines and demarcations, for roads, parking sites and industrial plants as well as safety markings.

- high-covering quality
- special valve for ground applications
- suitable for use in the marking trolley
- can sizes 500ml and 750 ml
- for durable marking
- high weather-resistance
- abrasion-proof

Linemarker 500ml / 750ml

	<b>201639 / 201714</b> white
	<b>201646 / 201721</b> yellow
	<b>201653 / 201738</b> red
	<b>201660 / 201745</b> orange
	<b>201677 / 201752</b> green
	<b>201684 / 201769</b> blue
	<b>201691 / 201776</b> grey
	<b>201707 / 201783</b> black

## TOOLS

**Marking trolley  
Speedliner<sup>2</sup> pro  
Ord.-No. 262760**

The simultaneous spraying  
with two COLORMARK  
Linemarker allows double  
operating speed.

**Marking gun  
Linemarker  
Ord.-No. 204524**

# For the environment...

## The eco nature trail at MOTIP DUPLI GmbH

In an attempt to create a natural habitat for a multitude of plants and animals, in 2002, MOTIP DUPLI started work on an eco nature trail with 11 stops. Meadows with fruit trees, wild flowers and wild hedges were planted, flanked by rainwater collection tanks and pond biotopes.

A habitat for insects and amphibians was created, along with nests for tawny owls and homes for birds, birds of prey and bats.

As well as being beautiful to look at, this type of landscaping provides a sanctuary for numerous breeds of native small animals.

The environmentally-friendly policy championed

by MOTIP DUPLI GmbH is also of benefit to its employees, since they are able to spend their breaks in close touch with nature.

## REACH

In October 2003, its draft proposal for a new European legal framework - the REACH system - was adopted. The acronym REACH stands for the Registration, Evaluation and Authorisation of Chemicals.

Following a long-winded and in part controversial legislative procedure, the REACH regulation came into force on 1 June 2007.

In accordance with the principle of the reversal of the burden of proof, REACH transfers responsibility for checking chemical safety to those who manufacture and import such products in the EU. Henceforth, these parties have to provide conclusive proof that their products are safe to use and will put neither the health of those processing or using them, nor the environment, at risk. MOTIP DUPLI purchases materials almost exclusively EU.
